

# M100 GT TURBOSTEAM MILK4 Tall cup Version

Colour: polished **Aluminium**

Design by Valerio Cometti+V12 Design

DT/2

DT/3

- Model specifically designed to fit tall cups or glasses.
- Thermal system based on a **10** liter boiler, with two heat exchangers in series, & independent coffee boilers. Each group temperature can be set independently and controlled directly by the display.
- The boiler is equipped with the patented Smart Boiler system and it is insulated with a special material that reduces heat loss.
- **1** standard steam wand + **1** Turbosteam Milk**4**.
- **1** hot water wand. **3** different doses and temperatures set : fresh water from the mains heated by steam at delivery.
- New advanced electronics.
- USB port to update the machine's software, download data and / or configuration of the recipes via USB.
- *Green machine*: last generation eco-technological solutions thought to conjugate energy saving and environmental respect.

Features	DT/2	DT/3
Steam wands	1+TSMilk <b>4</b>	1+TSMilk <b>4</b>
Hot water wands	1	1
Hot water selections	<b>3</b>	<b>3</b>
Boiler capacity (litres)	10	10
Smart Boiler technology	YES	YES
Independent coffee boilers	2	3
Independent coffee boiler capacity (cc)	400	400
Coffee boiler resistor (W)	800	800

Technical information	DT/2	DT/3
Width x Depth x Height with tall feet (in)	33.1x22x25.6	40x22x25.6
Weight (lb)	209.4	240.3
Power at 208 – 240 V~ 60 Hz (W)	5000-6700	5800-7700
